Data Flow Diagram

Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person or system outside the application that sends or receives data. Example: Applicant, Bank Administrator.
Rectangle with numbered header	Process	Performs an operation on incoming data and produces output. Example: Validate Application, Predict Approval.
Rectangle (solid fill, no number)	Data Store	Stores information for future use. Example: Applicant Database, Prediction Database.
Labeled arrow	Data Flow	Represents movement of data between entities and data stores.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
