

No. of Functional Features Included in the Solution

Date	03 July 2026
Team ID	SWTID-2026-9794
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

	Feature Name	Feature Description	Module / Component	Status	Marks Contribution
1	Applicant Details Form	Collects applicant personal, employment and financial details.	User Interface	Done	High
2	Input Validation	Validates applicant information before prediction.	Backend	Done	High
3	Data Preprocessing	Cleans and prepares applicant data for prediction.	Machine Learning	Done	High
4	Feature Encoding	Converts categorical data into numerical values.	Machine Learning	Done	High
5	Feature Scaling	Normalizes numerical features using saved scaler.	Machine Learning	Done	High
6	Credit Card Approval Prediction	Predicts approval or rejection using trained ML model.	Prediction Engine	Done	High
7	Result Display	Displays prediction result on the web page.	User Interface	Done	Medium
8	Model Loading	Loads trained model, encoder and scaler files.	Flask Backend	Done	Medium

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	8
Additional Features	0
Features Tested & Verified	8

s.no	Category	Features in Category	Example Features
1	User Interface	2	Applicant Details Form, Result Display
2	Backend / Logic	4	Validation, Preprocessing, Encoding, Scaling
3	Machine Learning	1	Credit Card Approval Prediction
4	Model Integration	1	Flask + best_model.pkl
