

Team Involvement in Demonstration

Date	04 July 2026
Team ID	SWTID-2026-9794
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Team Involvement in Demonstration:

This document records the active participation and roles of each team member during the project demonstration. It ensures that every member contributes meaningfully to the presentation and that responsibilities are distributed fairly and clearly.

S.No	Team Member Name	Role in Demo	Section Presented	Contribution Summary	Participation
1	M Hemanth	Team Leader and Application Developer	Introduction, Problem Statement, System Architecture, Flask Web Application, Future Scope & Conclusion	Led the team, introduced the project and problem statement, designed the system architecture, developed the Flask web application, and presented the conclusion.	Active

2	M K Tharun Sai	ML/AI Research Engineer	Dataset, Data Preprocessing, Feature Engineering, Machine Learning Model, Model Evaluation	Researched and prepared the dataset, performed preprocessing and feature engineering, built and trained the ML model, and evaluated its performance metrics.	Active
3	K Rajesh	Data Engineer	Dataset Collection, Data Cleaning, Data Pipeline, Data Preprocessing	Collected and organized the dataset, performed data cleaning and validation, built the preprocessing pipeline, and ensured data quality and consistency.	Active
4	Kanike Siddhartha	MLOps Engineer	Model Serialization, Model Deployment, Flask Integration, Live Prediction Demo	Handled model serialization, integrated the trained model with the Flask app, managed deployment, and supported the live prediction demo.	Active

Team Coordination Notes :

Aspect	Details
Team Leader / Coordinator	M Hemanth
Communication Method	WhatsApp, Google Meet, GitHub
Task Distribution	Responsibilities were divided between Machine Learning development and Flask Web Application development.
Overall Team Coordination Rating (1–5)	5/5/2026
Any Issues During Demo	Minor delay while loading the trained machine learning model during the live prediction demonstration.
How Issues Were Resolved	The Flask application was restarted, the trained model was loaded successfully, and the demonstration continued smoothly without affecting the presentation.
